***Response to Amendment***

1. It is noted that while Applicant's response to the last office action was received December 23, 2004, it was not forwarded to the Examiner until May 4, 2005. This delay is unusual and the reason for such is not known. The Examiner apologizes for the delay in responding to Applicant's reply.

***Claim Objections***

2. Claim 1 is objected to because of the following informalities: The claim must be written in single-sentence form. Note the format of the claims cited in the last office action..

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. The claim is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim is narrative in form and contains indefinite and functional language. The structure which makes up the inventive device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim must be in one sentence form only.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The claim is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fair (US Patent 4,784,440).

The automobile wheel shield disclosed by Fair shows a rim cover which is structured similarly to that of the Applicant's wheel shield. Note especially figures 2 and 7 of Fair. Fair shows the wheel shield to have a handle 30, a plate portion 15, and a girdle portion 16. The shield of Fair would prevent chemical protectants applied with a hand pump spray bottle, aerosol, or other application device to the tire from contacting the wheel when the shield is placed over the outside surface of the wheel rim.

***Response to Arguments***

5. Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions. Applicant must also discuss the references applied against the claims, explaining how the claims avoid the references or distinguish from them.

Applicant has not provided an argument as to why he believes the amended claim to define over the Fair patent used in the rejection of the claim.

Art Unit: 3617

The examiner still believes that Fair meets the limitations of the claim, and teaches and shows a wheel shield substantially similar to the shield shown and described by Applicant in the present application.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
